

June 15th, 2021

The Honorable Nancy Pelosi
Speaker of the House
U.S. House of Representatives
H-232, U.S. Capitol
Washington, D.C. 20515

The Honorable Charles Schumer
Majority Leader
U.S. Senate
S-221, U.S. Capitol
Washington, D.C. 20510

Dear Members of Congress,

As leaders from many diverse faith traditions, we are united in our call for a bold economic recovery and infrastructure package that creates family and community sustaining jobs while caring for our climate and our neighbors. It is the moral responsibility of our nation, and our sacred task as people of faith, to protect our ecosystems, work for environmental justice and public health, and address the climate crisis.

We urge you to support historic levels of investment that will safeguard Creation, address the impacts of climate change and pollution from fossil fuel extraction and related industries, and fulfill our moral obligation to leave a habitable world for future generations. Black, Indigenous, and people of color (BIPOC) and low-income communities have been hit the hardest by the triple health, economic, and environmental crises we face. The needs of these communities must be at the center of any infrastructure package.

As we move from COVID relief to economic recovery, this moment offers a once-in-a-generation opportunity to invest in the clean energy future while addressing the injustices of the past. We can achieve that by:

Expanding clean, renewable energy and modernizing our electric grid

We can accelerate the transition to clean energy by passing a national Clean Energy Standard that achieves 100% renewable, pollution free electricity by 2035, while also expanding investments in wind and solar power.

Electrify transportation and expand public transit

Now is the time to invest in American-made electric vehicles, build charging stations across the country, and make sure they are affordable to all. We can also connect our communities and reduce pollution by electrifying and expanding public transit.

Clean water infrastructure for all communities

Too many communities, especially in low-income urban neighborhoods and in Indigenous communities, don't have access to clean water. We must invest in lead pipe remediation, as well as programs that provide clean water to rural communities.

Invest with justice

BIPOC and low-income communities have been harmed the most by both this pandemic and our centuries of investment in fossil fuel infrastructure. Our understanding of justice demands that these communities must be at the center of our investments going forward. Specifically, we call for these communities, forced to bear an unequal burden of pollution and pandemic, to receive at least 40% of the investments. Additionally, to ensure a just transition, we must support dislocated workers and investment in communities historically dependent on fossil fuels.

Sincerely,

Estimados miembros del Congreso:

Como líderes de muchas tradiciones de fe diversas nos unimos a hacer un llamado por un paquete robusto de recuperación económica e infraestructura que cree empleos que sostenga familias y comunidades mientras se toma en cuenta a nuestro clima y a nuestros vecinos. Es la responsabilidad moral de nuestra nación, y es nuestra tarea sagrada como gente de fe, proteger nuestros ecosistemas, luchar por la justicia ambiental y la salud pública, y enfrentar la crisis climática.

Les exhortamos a apoyar niveles históricos de inversiones que preservarán la Creación, enfrentarán los efectos del cambio climático y de la contaminación a causa de la extracción de combustibles fósiles y de industrias afines, y a que cumplan con la obligación moral que tenemos de dejar un mundo habitable para las generaciones futuras. Las comunidades negras, indígenas y de otros grupos étnicos y raciales marginados, así como las comunidades de bajos ingresos, han sufrido la peor parte de la crisis triple de salud, economía y medioambiente a la que nos enfrentamos. Cualquier paquete de infraestructura debe enfocarse en las necesidades de estas comunidades.

Mientras hacemos la transición del alivio del COVID a la recuperación económica, este momento nos presenta una oportunidad única en nuestra generación para invertir en un futuro de energía limpia a la vez que atendemos las injusticias del pasado. Podemos lograr esto al:

Expandir la energía limpia y renovable y modernizar nuestra infraestructura eléctrica

Podemos acelerar la transición a la energía limpia si se aprueba un Estándar de Energía Limpia que logre una electricidad 100% renovable y libre de contaminación para el 2035, mientras también se aumentan las inversiones en energía eólica y solar.

Electrificar la transportación y aumentar la transportación pública

Este es el momento de invertir en vehículos eléctricos hechos en los Estados Unidos, construir estaciones de carga en todo el país y asegurarse de que son accesibles a todo el mundo. También podemos conectar nuestras comunidades y reducir la contaminación si electrificamos y expandimos el transporte público

Infraestructura de agua limpia para todas las comunidades

Demasiadas comunidades, especialmente aquellas en vecindarios urbanos de bajos ingresos y las comunidades indígenas no tienen acceso a agua limpia. Debemos invertir en reparar las tuberías de plomo, así como en programas que provean agua limpia a las comunidades rurales.

Invertir con justicia

Las comunidades negras, indígenas y de otros grupos raciales y étnicos marginados han sufrido la peor parte tanto de esta pandemia como de las décadas en las que hemos invertido en infraestructura de combustibles fósiles. Nuestra visión de lo que es justicia exige que estas comunidades sean el enfoque de nuestras inversiones futuras. Hacemos un llamado específico para que sean estas comunidades las que reciban al menos un 40% de estas inversiones, ya que han tenido que soportar un peso desigual de la contaminación y de la pandemia. Asimismo, para asegurar una transición justa debemos apoyar a los trabajadores desempleados e impulsar las inversiones en comunidades que históricamente han dependido de los combustibles fósiles.
